

## **Message by Managing Director:**

A Farmer who is a Custodian of Food Secure wants to become an Agricultural Engineer and Aim on EVERY FARMER TO BECOME AN AGRICULTURAL ENGINEER.

## **Our Vision:**

TIRUMALA AGRI TECH SOLUTIONS (TATS) is a leading company with an objective of making more interest on Agricultural Engineering especially for rural youth in introducing new agricultural technologies and to make farming as a traditional culture. We make farmers to receive commensurate benefits by doing agriculture with advanced technologies.

## **Our Mission:**

- Ø TATS will be able to make farmers more professional and more passionate about Agriculture because future of the country lies in the hands of Agriculture Engineering.
- Ø Our company employees do a vital job of increasing technologies to obtain optimum productivity of our crops and in the process of ensure food security of all of us.
- Ø Our technologies will bring the farmers who are running short in production to produce food themselves and help in feeding millions of hungry mouths too.

## **Company Profile:**

TIRUMALA AGRI TECH SOLUTIONS (TATS) is an ISO 9001:2015 certified company established in 2018 by a most experience person i.e., Mr M C Naresh (Graduated in B. Tech, Agricultural Engineering) who is having huge experience in Agricultural field operations. This company is mainly focusing on Agricultural Engineering activities like Farm Mechanization, Soil and Water Management activities and as well as Post Harvest Technologies. We are continuously developing new technologies which are most economical and sustainable and also promoting them among the farmers by appointing Distributors and Dealers in India and see that to obtain best results in each aspect of technology.
